

TTU Motorsports SAE Development Grant

Cookeville, TN- March 3rd, 2016

On Wednesday, March 2, TTU Motorsports was awarded the honor of the William R. Bill Adam Formula SAE Vehicle Development Grant. Each year, teams registered for the Formula SAE competition can submit an application for the grant, which awards \$500 to a single team for the enhancement of their vehicle design process. The grant began in 2004 to honor William R. "Bill" Adams, a 35-year member of SAE. Bill was an avid supporter of young engineers and worked in several areas of Automotive Engineering including exhaust development and work on a patent for an integrated Manifold-Muffler-Catalyst design.

Winners of this grant are selected by Bill's wife, Mrs. Pat Adam, and his daughter, Mrs. Julie Koerber. According to Kaley Zundel, the Collegiate Program Manager for SAE, Julie chose TTU Motorsports because of the passion in their application as well as their specific plans for the grant. Julie stated that "given that [TTU Motorsports] wants nothing more than to improve [their] design and performance for not just this year but years to come is something she felt her dad would have loved to see and support." TTU Motorsports is honored to receive this grant and plans to expand our testing capabilities, among other improvements.
